Dear Reader,

Welcome to the summer issue of our Members' Activities Newsletter. This time, we would especially like to draw your attention to our call for participation at the **"Engineering, Construction & Building Material Directory"**. This Directory is designed to promote the services and products of our Arab and Greek member companies in the construction sector, which includes countless activities.

There is growing demand for many construction works and infrastructure projects across the Arab world. This Directory will be a good opportunity to explore the potential of Arab and Greek companies for cooperation and it will give them an edge to compete with other international companies in order to win some of these projects. The Directory will be published towards the end of this year and it shall be distributed free of charge to the Arab countries through the Federations and Chambers of Commerce, businessmen, interested companies and the Greek diplomatic missions accredited to the Arab world.

On another note, we are pleased to have received positive feedback for the works of the 4th Arab-Hellenic Economic Forum, held in June 2015. We are committed to continue providing quality services to our members, and the business community at large, with selected activities and events, some of which will be announced in the coming period.

Once again, we would like to welcome the newcomers at the Chamber. We seize the opportunity to thank our member company, **Diadilos Solutions**, for sponsoring this issue. We are also grateful to our members for the nice words and encouraging comments regarding our Newsletter. We look forward to receiving more of your profiles and news in the coming issues.

We wish you all a relaxed summer season and Happy Holidays.

Harris Geronikolas
President

Rashad Mabger
Secretary General

HEADQUARTERS

Vianex was established in 1924 and has 90 years of experience in the pharmaceutical field having demonstrated exceptional business achievements in a wide range of activities such as manufacturing, licensing, marketing, exporting and distribution of pharmaceutical products.

Vianex, having four (4) state-of-art fully specialized Manufacturing Plants guarantees outstanding production capabilities.

The company covers the entire spectrum of manufacturing activities while it continuously upgrades the range of services.

During the last decades, Vianex has established successfully partnerships with well-known pharmaceutical firms worldwide based on varied distinct Licensees as well as distribution and contract Manufacturing Agreements.

The Company's successful and effective exporting activities have been achieved through its:

- Remarkable production capabilities
- High quality products
- Integrated customized solutions
- Prompt distribution and delivery services
- Efficient operational and marketing support services

Vianex's exceptional business achievements are derived from the main principles of its corporate philosophy:

- High quality
 - Commitment to Quality
 - Commitment to Excellence
- Professional Management
- Flexibility
- Dynamic export activity

دليل "الهندسة والإنشاءات ومواد البناء"

"Engineering, Construction & Building Material Directory"

تعلن الغرفة العربية اليونانية للتجارة والتنمية عن فتح طلبات النشر في دليل "الهندسة والإنشاءات ومواد البناء" للشركات العربية الراغبة بالعضوية في الغرفة العربية اليونانية للترويج عن خدماتها ومنتجاتها في هذا الدليل الذي سوف يصدر باللغة الإنكليزية في الربع الأخير من هذا العام ، نهدف من هذا الإصدار خلق فرص تتيح للشركات اليونانية والعربية تعزيز وتوثيق علاقات التعاون والشراكة فيما بينها في القطاعات التي يشملها الدليل وللفائدة المشتركة.

إن هناك الكثير من الدلائل التي تشير إلى أن سوق البناء والعمران في العالم العربي سوف يشهد حركة متزايدة في المشاريع الإنشائية وأعمال البنية التحتية مما يعني زيادة في الطلب على كافة الخدمات والمنتجات المتعلقة بهذه القطاعات وهي كثيرة ، وحيث أن المكاتب الهندسية وشركات تعهدات المقاولات العربية واليونانية قد اكتسبت خبرة عالمية واسعة في هذا المجال ، كما أن الشركات اليونانية قد قطعت شوطاً متقدماً في صناعة مواد البناء وما يتعلق بها ، لذلك فإن التعاون المأمول بين الشركات العربية واليونانية في القطاعات التي يروج لها الدليل سوف يؤهلها ولا شك إلى دخول السوق العربية والتنافس مع الكثير من الشركات العالمية للفوز ببعض هذه الأعمال والمشاريع .

نرجو الإطلاع على القطاعات التي يشملها الدليل كما هو مذكور في الصفحة المقابلة والتواصل معنا لأي استفسار حول الإشتراك في هذا الدليل ، كما أنه بالإمكان من خلال الرابط أدناه الإطلاع والحصول على طلبات الإشتراك :

PLEASE PRESS HERE

e-mail: chamber@arabgreekchamber.gr

سوف يوزع هذا الدليل **مجاناً** بطبعة أصلية ومن خلال أقراص مدمجة وعن طريق الوسائل الإلكترونية الأخرى في كافة الدول العربية واليونان وذلك عن طريق الاتحادات والغرف التجارية العربية والمؤسسات العاملة في قطاع الإنشاءات ومن خلال السفارات والقنصليات اليونانية المعتمدة في البلاد العربية.

ندعو الشركات العربية الاستفادة من النشر في هذا الدليل ومن أنشطة وفعاليات الغرفة العربية اليونانية للترويج عن كافة خدماتها ومنتجاتها .

نأمل أن لا تفوتكم فرصة الاشتراك في هذا الدليل .

آخر موعد لتقديم طلبات النشر والترويج يوم **الأربعاء الموافق ٧ تشرين الاول/أكتوبر 2015** .

EPSA

A story of refreshment

The history of EPSA dates back to 1924, when there was a surplus of lemons in the geographical area of Pelion. Observing a sales increase of traditional lemonade by peddlers, the owners of EPSA set the goal to create a factory that produces Soft Drinks. A German Chemical Engineer was invited to assist with the production of lemonade. It was then that the secret recipe was born and is preserved until today. Maintaining, already, cold rooms for the conservation of fruits and sale of ice, EPSA starts, as well, the production of Soft Drinks. At that time, EPSA was the basic distributor of power supply for the whole area around.

During the nine decades that passes since then, a lot of progress has been done. In 1937 EPSA was awarded the "Golden Award for Quality" at Thessaloniki International Fair. In 1940 the noted glass bottle of EPSA, that was meant to become the landmark of the brand, is designed.

Today, EPSA is still situated at exactly the same place in Agria area, in the city of Volos, maintaining modern facilities for the production of Soft Drinks. EPSA applies systems of quality control ISO 9001:2008, ISO 22000, and an IFS Food Standard certification.

The last years, next to the classic orangeade, lemonade, lemon soda and soda water, many new products have been added: Ice Tea in several flavors, Tonic, Sour Cherry drink, Organic Lemonade and Orangeade and Lemonade, Orangeade and Lemon Cola light (with sweetener from stevia plant). Last, but not least, "light drops", a liquid sweetener from the stevia plant, was the new innovation.

SARMED

SARMED is a pioneering Greek company in the field of Logistics. It is the head of a group of companies that offer a full range of supply chain services and the first privately owned company that started managing Customs warehouses 25 years ago.

Moreover, it specialises in the study, design, construction and development of warehouse complexes and cargo centres built to meet tailor made requirements. Today, it operates 150.000 sq.m. of privately owned high standard warehouses, covering the central axis of Greece: in Thriasio area (Attica region), Thiva and Thessaloniki (Sindos industrial area), while it plans its network expansion to other nodal hubs throughout the country.

SARMED operates its transportation and delivery services through SARTRANS (affiliated) and a selective network of collaborated transporters. Also, it performs its customs services through its affiliated firm SARANTITIS & CO, with a more than 50 years of experience.

Cutting edge technology and security is the environment in which it operates. Hands on experience of a really dedicated management, flexibility & excellence in services and robust financials (combined with zero debt) are the advantages that distinct it from the competition. Also, it emphasizes in CSR activities, including people, society and environment.

Long lasting partnerships with mainly multinational as well as robust domestic companies are proof of acceptance by the sector.

SARMED's vision is to be the first choice for logistics in Greece and the wider region, while at the same time claiming international recognition for the reliability, quality, flexibility, technological superiority and the range of vertical servicing offered to its dedicated customers.

MACON S.A.

MACON has been for decades one of the most trustworthy Greek distributors of modern construction materials.

In a world of rapidly evolving building techniques and products, MACON stays always up-to-date.

We scout for the new and the advanced in every construction-related field of technology: from basement waterproofing to green roofs.

Over the years, we have built our international distribution network to meet the ever-expanding export clientele.

Cooperating mainly with European producers, we deliver full trucks and containers to Middle East, Africa and Europe.

We are able to offer our clients prime quality products at competitive prices because we have the proper logistics infrastructure - logistics center 15.000 m² all covered - and we enjoy the confidence of the world's leading industries.

PRODUCT RANGE

- Dimple membranes
- Self-adhesive bitumen tapes
- Fiberglass mesh fabrics
- Metal frames for drywall building
- Polypropylene fibers
- Geotextiles
- Antimold-antibacterial paints
- Building thermal insulation systems
- Tile adhesives

SUNLIGHT RECYCLING S.A.

SUNLIGHT Recycling: Europe's most contemporary Lead-acid Battery Recycling Unit, in Komotini

SUNLIGHT Recycling is the Lead-acid Battery Recycling Branch of **SYSTEMS SUNLIGHT S.A.**, expanding the business ecosystem developed by the **Panos Germanos Group of Companies**. Recognising the potential of the Greek market, and having a clear commitment to support the domestic economy, SUNLIGHT Recycling has built the **most contemporary Lead-acid Battery Recycling Unit in Europe**, which constitutes an investment of over **€31 million** in its first phase.

The new recycling plant, built in a plot area of **4.2 hectare** in the Industrial Area of Komotini (Prefecture of Rodopi), is able to recycle **25,000 tons of spent batteries per year**, creating **multiple financial and environmental benefits** at local and national level.

SUNLIGHT Recycling presents the **first holistic approach to the recycling** of lead-acid batteries in Greece, as it covers the full recycling cycle. That is, the collection and accumulation of spent batteries, their recycling based on international quality standards, and the use of recycled materials for the production of new batteries in Greece by SYSTEMS SUNLIGHT.

Deriving Benefits

The new investment in Lead Battery Recycling will:

- contribute to the **strengthening of the environmental profile and performance** of Greece, through the use of cutting-edge technology in the field of lead-acid batteries recycling
- strengthen **domestic added value by promoting extroversy**
- create **new jobs** in the border area of Komotini
- enhance the **industrialisation of the country**, contributing to domestic competitiveness
- **reduce the foreign exchange outflow by € 40 million**, based on the drastic reduction in lead imports
- enhance **SUNLIGHT's competitiveness and profitability** through the vertical integration of the production process

Diadilos Solutions is comprised of **Loss Adjusters, Mechanical/Civil/Electrical Engineers**, and other technical staff all with many years of experience in a multinational corporate environment. Our vast extent of experience includes but is not limited to all areas of **loss adjusting, construction projects, technical & equipment inspections, quality assurance, NDT testing**.

Diadilos Solutions is currently expanding its services into the field of Hull & Machinery/P&I while servicing its clients with knowledge and expertise in this area.

Our Hull & Machinery department can assist you with any casualty that may result from collision, machinery breakdown, fire, stranding, water ingress, etc. All of our surveyors are fully experienced & trained to handle any loss concerning leisure boats, yachts and commercial ships (bulk carriers, ferries, etc.).

The services provided are as follows:

- Damage surveys
- Condition surveys for all type of vessels, equipment and floating & dry-dock facilities
- Supervision of repairs
- P&I (spills, pre-shipment, cargo damage, vessel conditions, incident investigation)
- Personnel injury and death
- Engine breakdown
- Pleasure craft evaluation surveys
- Loss of Profit
- Survey of Maritime terminals
- Pre-risk Inspections
- Towing Condition Reports
- On/Off Hire Inspections

In the area of **construction**, we offer a comprehensive range of services in order to assist our clients in any need such as:

- Building Energy Inspections
- Mold and moisture problem detection
- Non-destructive testing (NDT) of buildings and facilities

Our services also include Surveys, Assessment & Appraisal of property. All building evaluations are conducted according to the guidelines set by the Royal Institution of Chartered Surveyors (R.I.C.S.) and in cooperation with the Incorporated Society of Values and Auctioneers (I.S.V.A.).

In addition, our teams of qualified loss adjusters & engineers have the necessary knowledge & experience to handle **power & energy** related claims in the areas of:

- Windturbine
- Hydro and geothermal generation
- Solar energy
- Petrochemical plants
- Transformers
- Natural gas & piping installations

Neopox® Pool is an epoxy, solvent-based coating with UV filters incorporated, suitable for swimming pools. It is highly durable to the chlorination chemicals. Suitable for construction and polyester surfaces, that undergo significant mechanical stress and need chemical resistance. The product can be applied on pools, tanks (for non-potable water, dilute solutions of acids and bases), boats etc.

Fields of applications

- Swimming pools, tanks, fountains, boats
- Metallic structures

Properties & Advantages

- UV filters incorporated → Increased resistance to chaulking
- Highly resistant to the chlorination chemicals
- Excellent protection against fresh water, sea water, alkalis, dilute acids

Standard Colours

White, Light Beige, Sky Blue, Acqua Blue

*Tailor-made shades can be produced upon special agreement

Your confidence...is not a coincidence!!

Mediterranean Real Estate Yields Research Holiday home in Greece: "Ride the Momentum"

Every holiday homeowner should consider his property as a potential investment as well as a vacation home. This is Algean Property's approach to property ownership. We consider every potential holiday homebuyer as an investor. The Buyer makes his decision to invest a substantial amount of money for the acquisition of a real estate asset. A holiday homeowner can expect a return on his investment either by renting the property or by selling it in the future on better terms. In that context, the **Algean Property research team** compared the average gross yield for prime holiday homes in the Mediterranean, one of the most desirable regions for holiday homebuyers.

Country & Region	S Sale Price (€/m ²)	R Weekly Rental Rate (€)	Y Expected Gross Yield
Mykonos	5,500	8,500	7.4 %
Elounda	5,000	6,000	5.8 %
Rhodes	3,000	3,500	5.6 %
Chalkidiki	3,500	4,000	5.5 %
Dalmatian Coast	4,000	4,500	5.4 %
Corfu	4,500	4,500	4.8 %
Porto Heli	5,000	5,000	4.8 %
Tunis	1,500	1,500	4.8 %
Sardinia	7,000	6,500	4.5 %
Saint Tropez	15,000	12,500	4.0 %
Nice	10,000	8,000	3.8 %
Ibiza	7,000	5,500	3.8 %
Budva - Tivat	4,000	3,000	3.6 %
Cannes	13,500	10,000	3.6 %
Mallorca	8,500	6,000	3.4 %
Capri - Amalfi Coast	10,000	7,000	3.4 %
Marbella	6,000	4,000	3.2 %
Mediterranean Coast	3,000	2,000	3.2 %
Paphos	4,000	2,500	3.0 %
Aegean Coast	4,000	2,500	3.0 %
Malta	4,000	2,500	3.0 %

Our analysis shows that Greek destinations are the top performers. Analytically, in the Mediterranean, **Mykonos** comes first with an average gross yield of 7.4%, followed by **Elounda** and **Rhodes** with 5.8% and 5.6% average gross yield respectively.

In Greece, the potential buyers can also expect a significant increase in the value of their properties in the near future since they have already been discounted over the last six years. Our advice is "Ride the Momentum"!

Algean Property is a full-service property company focusing on the Hellenic market and other select opportunities in the EMEA region. Our expertise lies in the luxury residential and high-end hospitality development sector. We provide property search, acquisition assistance, valuation services and real estate research for individual private investors, potential homeowners, developers and investment funds.

SALFO's signs 6 new contracts in GCC countries within the last three months

Since 2014, SALFO SAUDI ARABIA is providing design services to MODON (Saudi Industrial Property Authority). Within the last two months SALFO has signed two new contracts; the complete design of Prototype Serviced Apartments for the Industrial cities of Sudair and Dammam and of Prototype Warehouses for the industrial city of Al Kharj. SALFO shall prepare civil/infrastructure, architectural, structural and electromechanical designs as well as preparation of relevant tender documents for construction. SALFO is the first company that was selected by MODON to implement the latest BIM technology in the design of its projects.

Since the award of the contract for the Project Management of the design and construction of "Place Vendôme", a luxury development of 971,000 sq.m, at the beachfront of Lusail City in Qatar, at the beginning of 2015, SALFO has been awarded two new contracts by private developers within the same area. The first project involves the construction supervision of Beverly Hills Residential Development within the Entertainment City of Lusail, which includes one hotel, two residential buildings and one office building, with a total area of 133,000 m² and the second, the design of Seef Lusail Residential Package.

In parallel, SALFO has been awarded by the Qatari Public Works Authority, which manages a large 7-year expressway and local roads programme, the contract for the provision of staff for technical support services. The services include design preparation or review, quantity surveying, traffic engineering, environmental impact studies, safety audits, preparation of tender and contract documents, assistance in planning and scheduling, contract management, introduction of new technologies and training. SALFO is already working with the Authority for the provision of construction supervision services for this significant programme.

Finally SALFO has been assigned by Department of Municipal Affairs of the Western Region Municipality of Abu Dhabi, the infrastructure design of an alternative site in Sector 3 of Hai Al Tejari in the Madinat Zayed commercial neighborhood. The scope of works includes the design of 9km of roadways, landscaping, pedestrian realm / right of ways, storm water drainage system, street lighting (LED system), sewer network, water network, electricity, irrigation network, telecommunication network and traffic control devices. Furthermore, the services include geotechnical investigation and topographic surveys, as well as Traffic and Environmental Impact Studies.

2015 New Major Projects for DEWISE ENGINEERING S.A. in the Middle East and Africa

DEWISE ENGINEERING S.A. specializes in the construction of Compact - Packaged Wastewater Treatment Plants (prefabricated units) for municipal and industrial effluents. The Company uses advanced treatment methods such as MBBR & MBR for designing smart and innovative package treatment plants that offer high quality effluent and efficient operation.

Our highly qualified team of experts along with our innovative product portfolio & services brings us in a position where we can successfully handle diverse projects, explore all possibilities and guarantee the most optimum wastewater method of treatment using **"DEWISE Smart Water Solutions"**, which are of the **"Plug & Play"** philosophy.

In this framework, a significant presence has been established in Europe and many other regions such as the Middle East and Africa. Our recent projects in the region verify in the best possible way that DEWISE ENGINEERING S.A. is a trustworthy and reliable partner.

More specifically, we have been awarded new contracts concerning the supply of ten (10) MBR Package Sewage Treatment Plants of large capacities, ranging from 1,000 to 4,300 m³/day, within the Middle-East & African region. These MBR systems come in a Compact-Modular form with innovative design and will provide an efficient and cost effective solution for the decentralized wastewater treatment applications, covering the following treatment stages:

- Screening Equipment and Lift Pump Station
- Pre-treatment Compact Combined Units (fully automated)
- Equalization and mixing Aeration Tanks
- Primary clarification Treatment
- Secondary Treatment
- Fine Screening and Tertiary Treatment using Membrane Bioreactors (MBR Technology)
- Sludge Handling: Collection, Thickening and Dewatering using Containerized Sludge Dewatering Plants

The Plants are fully automated and controlled through an advanced PLC & SCADA system and will be remotely monitored from DEWISE to ensure proper operation.

DEWISE ENGINEERING is an ISO 9001:2008 certified company for Quality Assurance in the design, manufacture, install, commissioning, and after sales services.

Please contact us for your project inquiries.

EVYP LLP
continues to provide the market
with its innovative range of products
of exclusively Greek production

EVYP LLP, the Greek Industry of Hydrolyzed Protein continues to provide the market with its plant nutrition – growth enhancer **Amino 16®**, its insect attractant **Dacus Bait 100®** & its series of liquid and water-soluble fertilizers **Threpsis®**, its innovative products of **exclusively Greek production**.

Amino 16 | **Dacus bait 100®**

For the current growing season:

• **Rice - Numerous benefits with the application of Amino 16®:**

Use Amino 16® along with the application of the herbicide and 15 days later along with the application of the fungicide. Amino 16® greatly helps to promptly overcome the stress of spraying and significantly improve the bonding of the ear, leading to greater final yield.

• **Cotton - Numerous benefits with the application of Amino 16®:**

1-2 applications of Amino 16® following the first appearance of squares increases retention, produces a greater number of balls per plant and leads to overall increased production.

• **Olive trees – The season of the olive fly has arrived, Dacus Bait 100® is the solution!**

For excellent, economic and organic protection of olive trees' production, the best option is the use of Dacus Bait 100® either in traps/mass trapping or by bait spraying.

EVYP LLP's executives are, as always, at your disposal for any further information.
